

PRESS RELEASE – 1 September 2021

TechAnax Achieves CMMI Level 3 v2.0

TechAnax LLC, a Service Disabled Veteran Owned Small Business (SDVOSB) and leading provider of information technology services and solutions to the U.S. Federal Government, has achieved an appraisal rating of Level 3 of the CMMI Institute’s Capability Maturity Model Integration for CMMI Development v2.0 (CMMI-DEV) and CMMI Services v2.0 (CMMI-SVC).

CMMI DEV / 3 SM

CMMI®V2.0 / Exp. 2024-08-19 / Appraisal #55713

CMMI SVC / 3 SM

CMMI®V2.0 / Exp. 2024-08-19 / Appraisal #55713

CMMI® is a process level improvement approach that provides organizations with the essential elements of effective processes to improve performance and ensure repeatability. The CMMI-DEV model further provides a comprehensive integrated set of guidelines for developing products, while CMMI-SVC provides the same guidance for services. Both models are designed and have proven to meet the needs of customers and end users. The TechAnax appraisal included organizational process management, project and work management, engineering and support for current software development and services projects for customers across U.S. Federal Government agencies.

An appraisal at Maturity Level 3 indicates that TechAnax is performing at the “Defined” level. At this level, processes are well characterized and understood, and are described in standards, procedures, tools, and methods. The organization’s set of standard processes is robust and sustainable which allows continues improvement, so the organization can align with customer needs.

“We greatly value this accomplishment and recognition by the CMMI Institute. At TechAnax we have always focused on continuous improvement and innovation. Following the tenets of CMMI, we have improved service to our customers as well as increased efficiency for ourselves,” said Bill Lytle, Executive Vice President and CIO of TechAnax. “Quality Innovation, Inc. and our Department of Transportation project showed us that by adopting and deploying CMMI processes we could efficiently share the knowledge gained at the project level across the company. Through this implementation, TechAnax continues to enhance quality and customer satisfaction which is an important discriminator for us in many of our bids and proposals,” said Byron Athan, TechAnax CEO.

About TechAnax
