Efficiency...

Vision

Provide information technology and management consulting services while transitioning from the small business to the full and open market. Provide our employees the authority to think freely and act independently. Exceed our customers and partners' expectations to maximize referrals. Ensure company growth is based upon sound financial and management principles. Maintain our small business values while providing big business results, competitive pricing and in developing trusted partners.

About Us

TechAnax was started specifically to provide our customers with services and solutions from a company with core values and work ethics reflecting integrity, trust, respect and accountability. We pride ourselves as a professional services firm providing customized information technology and management consulting solutions. Our solutions and core competencies include; Program Management, Network Design and Engineering, Information Assurance, Service Desk Operations, Data Center Consolidation and Cloud Migration Planning, Acquisition Support and Quality Assurance Procedures.

Capabilities

Program & Project Management

TechAnax delivers a proven program and project management methodology, based on industry best practices and standards established by the Project Management Institute (PMI). Our methodology is based on S... T... A... M... P... (STAMP). TechAnax's customizable methodology and process for ensuring the highest quality of program management and support services are delivered to our customers.

Cloud Services & Data Management

We work with you to define and establish the appropriate on-prem, hybrid, and/or pure FedRAMP cloud solution to meet your organizational requirements. We provide hosting at FISMA high and have a and are providing FedRAMP Platform and Software as a Service for several agencies.

DevSecOps

We were an early adopter of combining DevOps engineering development, cybersecurity, and information technology operations to shorten the systems development lifecycle while delivering secure, agile solutions that align with business objectives.

Enterprise IT Solutions

We improve the delivery of Enterprise IT Solutions, allowing our clients to plan, deliver, maintain, protect and enhance technology, to advance the efficiency and effectiveness of mission objectives.

Cyber Security & Information Assurance

We provide critical Network operations services, RMF controls and compliance, Infrastructure situational awareness tools, and Defensive Cyber Operations practices to ensure information protection.
